South Delhi Zone Rep.

SOFT SKILLS

- Team Leadership
- Structured Problem Solving
- Attention to Detail
- Adaptability

SHIVAM RAI

Full Stack Web Developer · Data Structures & Algorithms (Java)

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building full-stack web applications and solving 100+ Data Structures & Algorithms problems in Java. Certified by Apna College in both DSA with Java and Full Stack Web Development. Delivered a collaborative Gym Biometric Attendance System from design through deployment, coordinating a team of 3. Seeking a software development role to apply skills in Java, JavaScript, and system design.

EDUCATION

Saint Joseph School, NTPC Rihand | Sonbhadra, Uttar Pradesh
Higher Secondary – Class XII (Science Stream)

Notre Dame School, NTPC Badarpur | New Delhi
Secondary Education – Class X

PROJECTS

Gym Biometric Attendance System | 2024

System Design · Biometric Integration · Collaborative Project

- Built a biometric-based attendance system for 50+ gym members, automating check-in and eliminating 100% of manual entry errors.
- Implemented real-time biometric validation and tamper-proof records, reducing administrative processing time by ~70%.
- Designed end-to-end architecture across 3+ modules (registration, validation, reporting) ensuring cross-device compatibility.
- Coordinated a team of 3 members, distributing tasks and maintaining structured workflow from design through deployment.

Full Stack Web Application | 2024

HTML5 · CSS3 · JavaScript · Responsive Design

- Designed and developed a fully responsive full-stack web application achieving cross-device compatibility across mobile and desktop.
- Implemented 5+ interactive UI components and dynamic content rendering, applying Apna College Full Stack coursework.
- Maintained clean code standards and consistent commits, resulting in zero layout-breaking bugs post-deployment.

DSA Problem Solving Portfolio | 2023 – Present

Java · OOP · Arrays · Trees · Graphs · Dynamic Programming

- Solved 100+ DSA problems in Java covering arrays, linked lists, trees, graphs, and dynamic programming.
- Improved problem-solving efficiency through consistent time-complexity analysis across 6+ topic categories.
- Applied OOP principles and Java-specific design patterns to produce efficient, maintainable solutions.
